Digital Film Arts and Animation

Associate of Applied Science

Create thought-provoking imagery. Tell your story. Make a difference.

From viral sensations to Netflix to blockbuster hits, options for filmmakers to find audiences have never been greater. In addition, computer animation is one of the more vital career fields in the entertainment industry - with talented artists working on everything from animated films and television to video games and motion graphics.

Through Pima's curriculum, you'll create memorable storytelling using the practical aspects of video production and animation principles. Telling a powerful story is about triggering emotion in the viewer. Make a difference in the world by entertaining and informing.

We offer an Associate of Applied Science degree in Digital Film Arts and Animation with concentrations in Digital Film Art, and in Digital Film Arts Animation.

RECENT GRADUATES

Our Associate of Applied Science degrees are intended for the student who wants direct-to-employment training. Graduates of our program work locally for production studios and television stations and do freelance work for advertising agencies, movie productions, commercials and industrial videos. Students have transferred to the University of Arizona, Arizona State University and Northern Arizona University, as well as out-of-state schools, including the University of Southern California and Chapman College. However, students seeking transfer should make an appointment with the Arts Division advisor for guidance in transfer pathways.
